When it came time to pick a transmission for our All Air Camaro project car, we wanted one that would work for serious drag racing and could be mounting behind any engine combination that we could hang in front of it. The GM Powerglide is a tried and true gearbox for the track with its simplicity and toughness. One of the minor advantages of Powerglide for really big engines — you could get it behind a 409 for a while — was that its lighter internals consumed less power than the Turbo Hydramatic; one estimate I saw suggested that it was something like half as much.
