

Download Saeco Royal Manual Ventilate

Maintenance - Saeco Royal Cappuccino displays Ventilate Segafredo Zanetti ... #1 Problem & Quick Fix with Central Air Conditioning Not Cooling ... Saeco Royal Professional Espresso Machine ... Saeco Royal Cappuccino – “Ventilate” message showing. Solution – The “ventilate” message just means that an air bubble has been created inside the machine. – The “water button” is the top, left button on the keypad. – Firstly, check that there is water in the water tank (back left hand side of machine). The coffee machines have a built-in LED panel to display various status messages and to alert the owner to perform necessary maintenance. Part of the regular maintenance of a Saeco machine is ventilation, which cleans out the boiler unit and removes coffee residue. The process involves running boiling water through the unit.
